REPORT

OF

THE VISITING JUSTICES

TO THE

SEVERAL COURTS OF QUARTER SESSIONS ASSEMBLED.

Asylum, December 20th, 1855.

The Committee of Visiting Justices of the Joint Counties' and City Asylum, have to report that the establishment continues to be well and efficiently conducted.

The daily average number of patients during the past year was 262; the actual number now in the asylum is 259, viz.: 114 males, and 145 females. About 15 additional males, and 10 additional females, could be conveniently received; and the number of male patients could be still further increased by making a dormitory on the attic floor, as has been done on the females' side.

The admissions during the past year were 98; the removals were—cured or relieved, 56; died, 39; sent back to the custody of friends, 2; escaped, and since found in custody of friends, 1; criminal, sent to Bethlem by order of Secretary of State, 1; total, 99.

One servant has been discharged for misconduct to a patient, with the other servants and with all the officers the committee are fully satisfied.

Additional employment has been obtained for the male patients by taking into the garden and levelling a piece of ground used during the construction of the asylum as a stone quarry.

The balance in hand of the repair-fund being £184, no farther call on the united counties and city will be at present required.

The weekly charge of 10s. for each patient cannot be reduced as long as the present high price of provisions continues.

(Signed) ARCHER CLIVE, Chairman.

COMMISSIONERS' REPORT.

County Asylum, Abergavenny, July 30, 1855.

129 patients have been admitted since the last visit of the Commissioners on the 23rd of June, 1854.

Within the same period, 63 have been discharged and 45 have died.

There are at the present time 266 patients in the establishment, namely, 115 men and 151 women.

The men patients were generally tranquil, but several of the women were disorderly and noisy.

We found the wards and offices clean, and free from offensive smell, and the cultivated as well as the ornamental grounds, external to the airing courts, in good order.

The dinner provided for the patients was abundant, of good quality, and well cooked. It consisted of boiled beef, potatoes, and cabbage.

The third story on the women's side has been converted into a commodious and comfortable dormitory, and is at the present time occupied by 25 patients.

We repeat the recommendations made in the last entry of the Commissioners, as to the supply of furniture, improvement of the dress among the women, larger share of exercise for the refractory patients, and occupation of the vacant rooms contiguous to the laundry.

We urgently recommend that immediate steps be taken to complete the walk round the boundary of the estate, so as to afford means of extended exercise to those women patients who are subject to occasional excitement.

We also recommend—1st, That a night watch be appointed on the men's side, and that the condition of the patients during the night time be regularly recorded by both nurses.

- 2.—That the division walls separating the two small airing courts from the larger ones be taken down.
- 3.—That the stock of amusements and means of occupation be increased.
- 4.—That some of the women patients be occupied in keeping their own airing courts in order, and also in light husbandry.
- 5.—That a list of the names of those patients who are not employed be occasionally made out, showing the assigned reason for non employment, and a like record of those who do not take extended exercise.

Provided suitable arrangements can be made we think a few of the men patients might be placed to live at the farm buildings.

We think it highly desirable that efforts should be made to obtain an additional quantity of land, either by renting or purchasing.

We have made several additional suggestions to Dr. Allen, with a view of advancing the condition of the inmates, and promoting the efficiency of the establishment.

(Signed)

G. GASKELL, W. G. CAMPBELL,

Commissioners in Lunacy.

TO THE COMMITTEE OF VISITORS

OF

The United Counties' Lunatic Asylum, Abergavenny.

Report of Medical Superintendent

FOR THE YEAR 1855.

A fourth year has now elapsed since the opening of this Asylum for the reception of the Insane Poor.

At the close of the year 1854 there remained in the Asylum 260 patients—110 males and 150 females. During the year 1855, 100 persons have been admitted, viz. 57 males and 43 females; of these, one male was a criminal lunatic admitted under the warrant of the Secretary of State.

The re-admissions during the year amounted to 14, viz. 6 males and 8 females.

The discharges during the year have amounted to 64, viz. 29 males and 35 females: of these, 28 males and 32 females were recovered or relieved; one male (a dangerous criminal lunatic) was removed to Bethlem Hospital by order of the Secretary of State, two females were discharged on the undertaking of friends to take proper care of them, but they were not improved in mind, and one female (an epileptic patient) succeeded in effecting her escape, when out for exercise with other patients; after some time it was ascertained that she had reached home in safety, and was under the care of her friends.

The deaths during the year have amounted to 39, viz. 24 males and 15 females; 16 of the deaths occurred in persons advanced in life, varying from 60 to 80 years of age. The average duration of life in the whole number was 53 years.

The state of bodily health of the patients admitted during the year was "good," or "tolerably good," in 38 cases; in the remaining 62 cases, it was "feeble," or "bad," and complicated with various diseases. The cases of "epileptic mania" admitted during the year have amounted to 18. The average daily number of patients resident during the year have been 262. There now remains in the asylum 257 patients, viz. 114 males and 143 females.

The general health of the establishment has continued to be very good, and no diseases of an epidemic or contagious character have prevailed.

One case of sudden death took place during the year, on which a coroner's inquest was held, and a verdict of "Died by the visitation of God" returned; it occurred in an epileptic patient. She was seen by the night nurse about four o'clock in the morning, and was then in her usual state; in two hours afterwards she was found dead in bed. A somewhat similar case occurred in the Somerset County Asylum about a year ago, and the visitors of that asylum requested the opinion of the Commissioners in Lunacy as to the necessity of holding inquests in such cases. Their opinion was, that in cases of such grave disease, where death might reasonably be expected to occur at any time, an inquest was not necessary. opinion will form a guide for the future in similar unfortunate cases, where no suspicion can be entertained of the persons having come to their deaths by unfair means. One aged female, in attempting to rise from her chair when seated in the airing court, fell down and fractured the neck of the thigh bone; another, a young woman, was seized with an epileptic fit, and in falling her arm came in contact with the

fire-grate; she was immediately removed, but before this could be done, she had received a rather severe burn on the external side of the fore-arm. One case of strangulated inguinel hernia occurred in a male patient. He is a violent man, and the strangulation was probably caused by his placing the truss on the hernia and not over it; it was after some difficulty reduced without operation, and he has now regained his usual strength. No other acceident of any importance has occurred during the year.

A considerable proportion of the cases admitted during the year had, previously to admission, either attempted suicide or displayed strong suicidal propensities. In the majority of such cases, the quiet and regularity of an asylum, the moderately nutritious diet, and the absence of all cares and annoyances has had in a short time a surprisingly beneficial effect, both on the mental and bodily health: such cases are, however, very liable to relapse when they go out into the world, and have to undergo the cares and anxieties inseparable from their condition in life.

The hereditary taint and congenital deficiency of intellect combined, form a large proportion of the admissions during the year; it is however gratifying to state, that but one case of "idiotcy" now remains in the asylum.

The supply of water during the year has not at any time failed; on the contrary, the quantity of this most necessary article has been abundant and satisfactory.

With the exception of the man-servant, whose misconduct the committee investigated and decided on, the conduct and attention of the attendants and servants in their respective duties has generally been good.

The established dietary continues to answer well, and, as usual, the only deviations from it have been on the grounds of sickness, and these have been few and unimportant.

CHAPLAIN'S REPORT.

January 10th, 1855.

Gentlemen,

It gives me much pleasure to testify to the continuing and even growing attachment of a considerable number of the patients for the daily services in the asylum chapel: some from a desire to diversify their occupations, others from purely devotional feeling, (and even devotional instinct without understanding to direct it to its intended objects) are very regular attendants at these services; and their conduct on such occasions is decent and proper, conformable mostly to the example set them by their attendants. The services are varied by the introduction of psalm singing, chanting, and a running commentary on some of the portions of scripture which are read to them, and the reading of a few of the prayers in Welsh.

The sick whom I have visited have exhibited features calling for little fresh remark, being repetitions, with slight variations, of peculiarities already recorded.

In the supply of religious books, I have been guided very much by the head attendant, regulating it by a desire of affording the patients as few books to destroy as can be done without deprivation to any who desire to read, and are not too destructive.

I have the honour to be,

Your obedient servent,

WILLIAM G. DAVIES,

Chaplain.

"	Balance			_	106	17	11
				£1	1287	13	10

The balance as rendered in favour of Farming Account for the past year is smaller than that of former years, caused from the Horses (which are now disposed of) not earning half their cost of maintenance; and from the loss, by death of "Puerperal Fever," of a valuable Cow.
